

Instructions for  
Lincoln Aluminum Drink Rail Brackets

## **Option 1 Over the Post Drink Rail**

1. Cut post length to 36 $\frac{1}{4}$ " for 36" rails or 42 $\frac{1}{4}$ " for 42" rails. Do NOT cut top stair rail post.
2. When attaching top rail, set top bracket flush with the top of the post.
3. Place 1 drink rail bracket onto top rail against top rail bracket. Attach with (2) #10x1" screws (included).
4. Repeat step 3 on the other end of top rail.
5. Attach additional drink rail brackets along top rail, 24" maximum spacing.

## **Option2 Between the Post Drink Rail**

1. Install all posts and rail sections normally.
2. Place 1 drink rail bracket onto top rail against top rail bracket. Attach with (2) #10x1" screws (included).
3. Repeat step 2 on the other end of top rail.
4. Attach additional drink rail brackets along rail, 24" maximum spacing.
5. Attach drink rail to brackets with #10 flat head screws (not provided).
