

**PENETRATING SEALER**

WATER-BASED // 40% ACTIVES

# SILOXA-TEK<sup>®</sup> 8505

Penetrating Concrete Sealer **with oleophobic additive**

AN INDUSTRIAL-GRADE, WATER-BASED, SILANE/SILOXANE CONCRETE SEALER ENGINEERED TO REDUCE WATER AND MOISTURE INTRUSION, PROTECT CONCRETE FROM DEICING SALTS AND RESIST STAINING FROM OIL AND GREASE.

## **BENEFITS:**

- // Water, Salt & Oil Repellent
- // Prevents Deicing Salt Damage
- // Resists Mold, Mildew & Efflorescence
- // Resists Cracking & Surface Erosion
- // Excellent Oil & Stain Resistance

## DESCRIPTION:

Siloxa-Tek® 8505 is a deep penetrating, high performing, long lasting water-based concrete sealer. It is able to resist water intrusion, deicing salts, chlorides, freeze-thaw cycles and staining from oils and greases. This proprietary {silane/siloxane} concrete sealer contains a proprietary stain repellent additive that makes cleaning up stains easier and dries completely clear with a natural finish that will not change the look or appearance of the surface. It is an excellent choice to seal concrete driveways, garages, shop floors and patios. A great water-based alternative to the Siloxa-Tek® 8510.

### PERFECT ON:

Concrete, concrete blocks/cinderblocks, brick, pavers, exposed aggregate, stucco, stone, slate and sandstone.

### DESIGNED FOR:

Driveways, sidewalks, patios, pool decks, garages, chimneys, and roof tiles. Also used for plazas, food courts, parking garages and machine shops.

### MEETS OR EXCEEDS:

ASTM E-96: Water Vapor Transmission

ASTM E-514: Water Penetration

ASTM C-672: Scaling Resistance

AASHTO T-259: Chloride Ion Penetration

NCHRP 244 II/IV: WVT, Chloride Intrusion

OHD L-34: Depth of Penetration
